Masergy Extends Managed Detection and Response Platform with Office 365 Security Monitoring

Enables enterprises to mitigate potential attacks with greater visibility and incident response

DALLAS – Jan. 23, 2018 – Masergy, a leading provider of hybrid networking, managed security and cloud communications solutions, has released new capabilities to mitigate Office 365 security risks by leveraging the Masergy Unified Enterprise Security (UES) managed detection and response (MDR) platform. As a fully managed solution, Masergy Office 365 Security Monitoring facilitates enterprise customers' Software as a Service (SaaS) security strategies with quick deployment, scalability, and minimal customer effort. The capabilities are bundled with all UES deployments for easy customer access.

"SaaS applications, such as Office 365 have many business advantages, but also create significant security risks," said Craig D'Abreo vice president of security operations, Masergy. "Our integration with Office 365 combines advanced security analytics from Microsoft with Masergy's threat intelligence, patented machine learning, and 24/7 incident response. The result is a turnkey comprehensive MDR solution for Office 365 that is cost-effective and scales quickly."

Masergy leverages Microsoft's built-in Cloud App Security analytics with its UES platform to enable continuous 24/7 monitoring, which is critical for rapid identification and response to attacks before damage occurs.

This expansion of Masergy's holistic Managed Detection Response ecosystem is the latest cost-effective solution that provides scalable coverage for servers, virtual machines, cloud operating systems, containers, and now SaaS applications.

About Masergy
Masergy owns and operates the largest independent Software Defined Platform in the world, delivering hybrid networking, managed security, and cloud communication solutions to global enterprises. Our patented technology, customizable solutions, and unmatched customer experience are why a growing number of leading organizations rely on Masergy to deliver performance beyond expectations.
