

## **MASERGY BUILDS ON SDN EXPERTISE WITH CLOUD-BASED ROUTER**

New Service Delivers Routing Capabilities via Masergy Cloud Network

**DALLAS – February 11, 2015 – [Masergy Communications Inc.](#)**, global leader in managed networking and cloud services, today announced the general availability of its [Cloud-Based Router](#). Masergy is turning the vision of Software Defined Networking (SDN) into reality with innovations that reduce costs and complexity for its enterprise customers.

The Cloud-Based Router is a full-featured managed router, complementing Masergy’s existing on-premise Managed Router solutions. The Cloud-Based Router can be rapidly deployed to meet customers’ changing business requirements and application performance needs. The Cloud-Based Router reduces the capital expenses of proprietary routing hardware and the administrative costs associated with managing physical routers in corporate and branch offices.

The Cloud-Based Router is offered in Standard and Advanced service levels with a Business Continuity/Disaster Recovery option available for the Advanced service. Both services support bandwidths of up to 100 Mbps. Customers can use both the Cloud-Based Router and on-premise Managed Router solutions to optimize cost and performance by location and application environment.

“It is Masergy’s heritage to innovate and create flexible solutions that reduce the complexity of running global networks,” said Tim Naramore, CTO, Masergy. “With the introduction of our Cloud-Based Router, Masergy is uniquely positioned to help our customers cost-effectively use the latest technologies to support their specific business requirements. Expect to see additional SDN and NFV innovations in the near term.”

### **About Masergy**

Masergy owns and operates the largest independent global cloud networking platform for enterprises. Our managed solutions help businesses compete in the global marketplace with real-time analytics, unified communications as a service, security as a service and software defined network control. Masergy's patented technology, customizable solutions and unmatched customer experience are why a growing number of global enterprises rely on Masergy to deliver performance beyond expectations. For
