

**MASERGY ACHIEVES TMC AWARD TRIFECTA FOR UNIFIED COMMUNICATIONS EXCELLENCE,
NFV AND SDN PRODUCTS OF THE YEAR**

*Company's Vision of Simplified, Global Communication Continues to Impress Industry Judges
Year After Year*

Dallas — April 10, 2017 — [Masergy](#) today announced the company has racked-up three TMC awards for its [Global Unified Communications](#), [Network Function Virtualization](#) and [Software Defined Network](#) offerings. Already the recipient of numerous awards, Masergy's solutions continue to redefine how global networking and communications are conducted, deployed and maintained.

Judges continually elevate Masergy's solutions above traditional business communication offerings, citing innovations that consistently simplify the complicated process of deploying global communications. Products and awards included within this recent trifecta include:

- **2016 Unified Communications Excellence Award** - Through an extensible, highly scalable IP communications infrastructure, the company offers a redundant carrier-grade platform for voice, video and mobility communications for a wide range of enterprises and multi-location organizations, provided with comprehensive 24/7 client support. Masergy's global carrier-grade UCaaS platform is integrated with the company's managed global network. This provides enterprises with a total business communications solution with built-in automatic failover and disaster recovery to increase reliability.
- **Internet Telephony SDN Product of the Year Award** - Masergy's global networking platform was built on a Software Defined Platform that simplifies and automates many of the routine tasks of managing a global network. It offers best-in-class visibility and control, and the performance required to support the advanced applications enterprises are relying on to transform their businesses.

- **Internet Telephony NFV Product of the Year** - Masergy's Virtual $f(n)$ Managed Network Functions offer a family of fully managed, distributed network functions where organizations can choose the features via a software delivery model akin to mobile app stores, where software can be deployed to branch office locations as needed.

“Organizations know they must shift their rigid, legacy, one-size-fits-all IT model to a more agile, business driven approach,” said Tim Naramore, CTO at Masergy. “This transformation requires adoption of an integrated, modular and scalable IT services model that can be easily provisioned on demand. We are proud that TMC has recognized our innovative approach.”

About Masergy

Masergy owns and operates the largest independent Software Defined Platform in the world, delivering hybrid networking, managed security and cloud communication solutions to global enterprises. Our patented technology, customizable solutions and unmatched customer experience are why a growing number of leading organizations rely on Masergy to deliver performance beyond expectations.
