Masergy Secure WiFi is a dual-band, dual-stream wireless access point (AP) with built-in enterprise security powered by Fortinet®. Capable of supporting either low-density areas such as retail stores or large high-density corporate offices, Masergy Secure WiFi hardware delivers speedy and secure 802.11ac wireless access to your workforce.

Extend award-winning WAN management into your corporate LAN's WiFi

Masergy Secure WiFi extends Masergy managed networking services from the WAN into the LAN. Perfect for hybrid WAN deployments with a mix of private Layer 3 links at large offices and SD-WAN at branch locations, Masergy Secure WiFi delivers fully managed wireless in a plug-and-play solution. Whether you're swapping out existing APs or building out a whole new wireless system for your employees, Masergy Secure WiFi enables secure, managed wireless for as many as 130,000 simultaneous users.
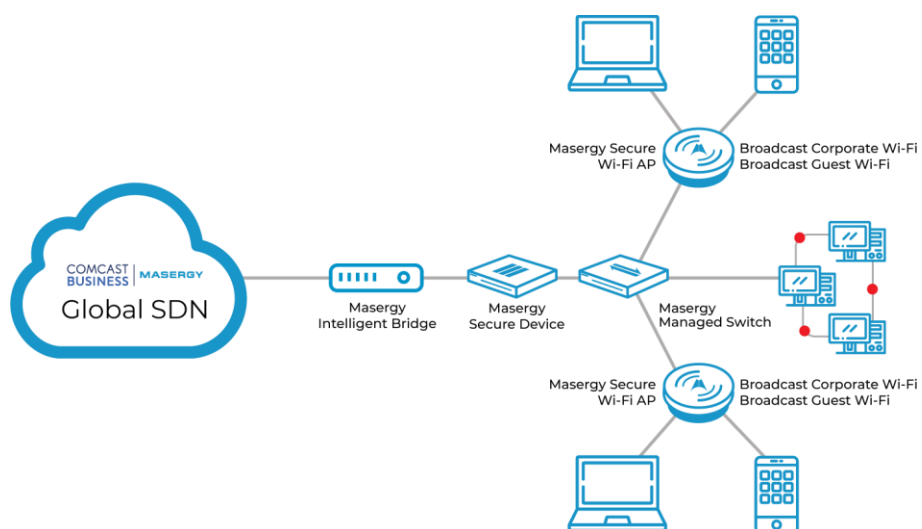

Features

- Dual-band WiFi for intelligent uninterrupted wireless connections to enterprise networks
- Fortinet® powered security hardware designed to protect and accelerate your network data
- Built to mount anywhere and deliver secure WiFi for up to 130,000 simultaneous users

Benefits

- Stops rogue access point wireless scanning, providing maximum protection of regulated environments with PCI-DSS compliance
- Covers either small branch offices or high-density office environments with secure WiFi signals for enterprise grade wireless network access
- Extends the award-winning 24/7 Masergy WAN monitoring and real-time control into the customer LAN for enhanced security and peace of mind

Flexible deployment options for any-sized location

Masergy Secure WiFi APs fit your specific locations to deliver maximum wireless coverage for your workspace. With up to eight internal antennae and the latest 802.11ac Wave 2 specifications, you can cover either low/medium density areas with open spaces such as retail stores and classrooms or large high-density corporate offices. Give your users the ability to choose between dual-band 2.4GHz and 5GHz WiFi on up to 16 SSIDs supporting up to 512 users per AP —all with the award-winning end-to-end network visibility and control enterprises have come to expect from Masergy.
