

Poly Trio 8300 Speakerphone

Smart Conference Phone for Small Meeting Rooms

Product Sheet: UCaaS

Smart conference phone for small meeting rooms

Think your small meeting room has limited possibilities? Think again, the Poly Trio 8300 transforms any small conference hub into a smart collaboration space with the touch of a button. Launch conference calls in seconds. Fill the room with rich audio. Launch conference calls in seconds. Fill the room with rich audio. Tune out distractions and keep everyone engaged with Poly NoiseBlock technology. Optimal coverage ensures every voice is heard. One device provides Wi-Fi2, USB, Bluetooth® and IP connectivity, and a simple interface launches meetings in seconds. In addition, you get future-proof flexibility with the option to easily add video conferencing and content sharing accessories. With all these options in one smart device, you can help your teams get more done in less space and make meetings more engaging for everyone.

Features

- Audio connectivity for mobile devices
- Wi-Fi audio calling (2.4-5 GHz)
- Poly NoiseBlock eliminates background noise
- Future-proof flexible modular architecture

Benefits

- Make every meeting productive with Poly's legendary voice quality and up to 3.7 m/12 ft. range
- Start a meeting in seconds with one-touch-join
- Maximize your investment with connectivity to on-premises and cloud platforms at once—ideal for hybrid environments
- Reduces time, money and IT resources with robust management and deployment options
